Product Release- Holiday G37 with innovative Sliding Wall System

Since its official release in January 2009 the Sunliner Holiday Series has been extremely successful. This range has now exceeded production volumes of 60 units and the ranges' popularity is set to continue. Owing to the immense success of this range an additional floorplan has been added. The Holiday G37 is a combination of the G34 and G35 layouts.

The G37 offers the popular rear ensuite and semi-island bed combination, however also includes a lounge & swivel seat configuration in the front. As with all Sunliner Holiday motorhomes the G37 is standard with electric step, roll out awning, innerspring mattress, moulded fiberglass skirtings & flares and is available on either Fiat Ducato X250, Iveco Daily and Ford Transit chassis.

The first G37 produced was also the first vehicle in the Sunliner range to showcase the new sliding wall system. The innovative sliding wall system allows the solid dividing wall between the bathroom and bed to slide away allowing for the bed to become a full island bed. This feature is now available as an additional option on all island or semi island bed layouts (including the G37).

The Holiday G37 is on display at selected dealers now. Images on this vehicle will be available early July.

For further details or where to inspect the Sunliner Holiday G37 or discuss the new Sunliner "Sliding Wall System" please contact 1800 SUNLINER or visit www.sunliner.com.au.
